

HEPATITIS B STUDY AT THE NATIONAL INSTITUTES OF HEALTH

Researchers at the National Institutes of Health (NIH) are conducting a study on hepatitis B. The goal of this study is to:

- describe the natural history of hepatitis B (HBV) infection.
- evaluate changes in HBV infection status in individuals.
- identify participants who are potential candidates for one of the treatment studies to be conducted.

If you have hepatitis B and are willing to participate in a study at the NIH, please call the Patient Recruitment Office.

Location:

The NIH Clinical Center, America's research hospital, is located on the Metro red line, Medical Center stop, in Bethesda, Maryland.

All study-related tests are provided at no cost.
